Professional Summary

Recent B.Tech Computer Science graduate skilled in full stack development and AI integration. Gained experience in building and deploying end-to-end applications and integrating AI model serving through 4 industry internships. Proficient in TypeScript and Python. Seeking to contribute to impactful, intelligent software solutions.

Skills

Languages: TypeScript, Python

Frontend: React, Next.js

Backend: Node.js (Fastify, Express), FastAPI

Databases: PostgreSQL, MongoDB, Redis

Other: Git, GitHub, Docker Compose, GitHub Actions

Experience

Full Stack Developer Intern — Inbox Infotech Pvt. Ltd.

Jan 2026 — Jun 2026

- Engineered a reusable microservice starter template using Node.js, TypeScript, Fastify, Zod, Prisma, Biome, and Docker; enabling faster backend service development across projects.
- Developed an electronics e-commerce prototype (MERN stack); featuring API rate limiting, type-safety (Typescript), schema validation (Zod), API docs, API testing (Vitest), CI/CD pipeline (GitHub Actions) and Dockerized deployment.
- Fixed UI bugs in a React Native mobile app.

Data Science Intern — Amdox Technologies

Dec 2025 — Jan 2026

- Completed formal training in data science concepts, workflows, and machine learning fundamentals.
- Developed an AI-based employee sentiment & stress detection system that analyzed emotional and mental state indicators, automated task allocation, and reported critical cases to management or medical professionals when required.
- Implemented sentiment analysis using NLP, stress/emotion classification model, and task recommendation engine.

Full Stack Developer Intern — Cognifyz Technologies

Jun 2025 — Jul 2025

- Developed & deployed an electronics e-commerce web application using MERN stack.
- Implemented RESTful API, modular architecture, JWT auth, role-based access and payment gateway (Stripe).

Full Stack Developer Intern — MaMo Technolabs LLP

Dec 2024 — Jan 2025

- Developed & deployed a furniture e-commerce platform using PHP & MySQL; featuring admin inventory management, search with filters/sorting, cart & wishlist, and responsive UI.

Projects

Ember — Dating site

Live Demo | [GitHub](#)

- Tech Stack:** React, Node.js, Express, MongoDB, Mongoose
- Implemented:** Email verification & password reset, image uploads, geolocation-based user discovery, interests/preferences based recommendation algorithm, swipe-based matching interface, real-time chat (WebSockets) and notifications.

SmartHire — AI Interviewer

Live Demo | [GitHub](#)

- Tech Stack:** React, FastAPI, SQLAlchemy, SQLite
- Implemented:** State Management, role-based question generation, webcam/microphone integration, speech-to-text conversion,

Education

B.Tech in Computer Science Engineering — GSFC University, Vadodara

2022 — 2026
